Personal mobile devices used for work purposes must be enrolled in the Intune – Microsoft Endpoint Manager program utilizing Company Portal so enterprise applications can be managed, and security requirements enforced. Follow the steps below to enroll an iOS device into the program.

NOTE: Enrollment steps may vary depending on operating system speed and network connectivity. It may take at least thirty (30) minutes to one (1) hour for the applications to install. **For a seamless installation, uninstall all previously downloaded work applications before beginning.**

1. From the App Store, search for and install the "Intune Company Portal" app from Microsoft.
2. Once installed, open the Company Portal app.
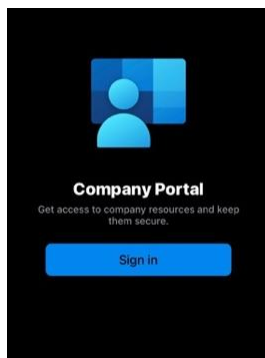

3. Enter your PDS-issued email address, and then follow the prompts to enter your Okta credentials. For more information, refer to the *Single Sign-On powered by Okta* quick reference guide located on the PDSConnect MY Self tab.

4. Select **Ok.**
5. Select **Allow**.
6. From the Devices tab, select your device.
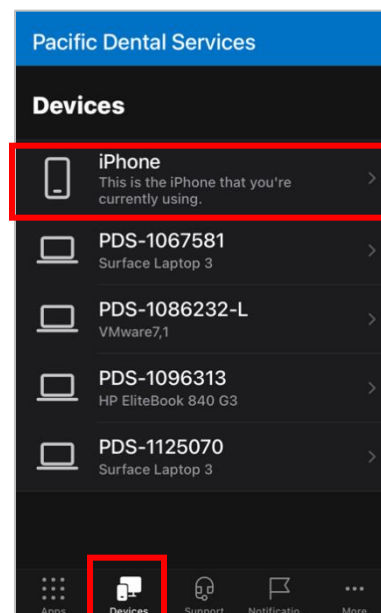

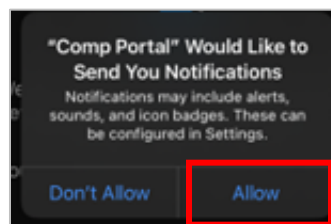

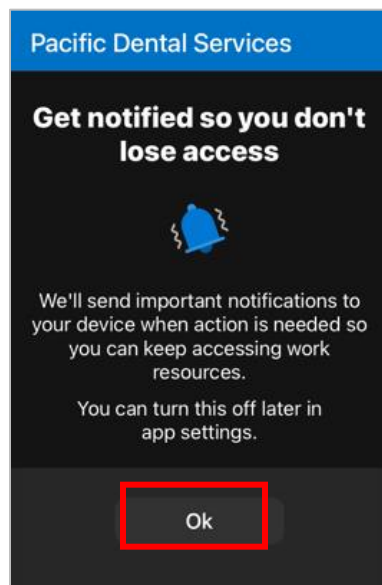

7. Select **Begin Setup**.
8. Select **Begin**.
9. Select **Continue**.
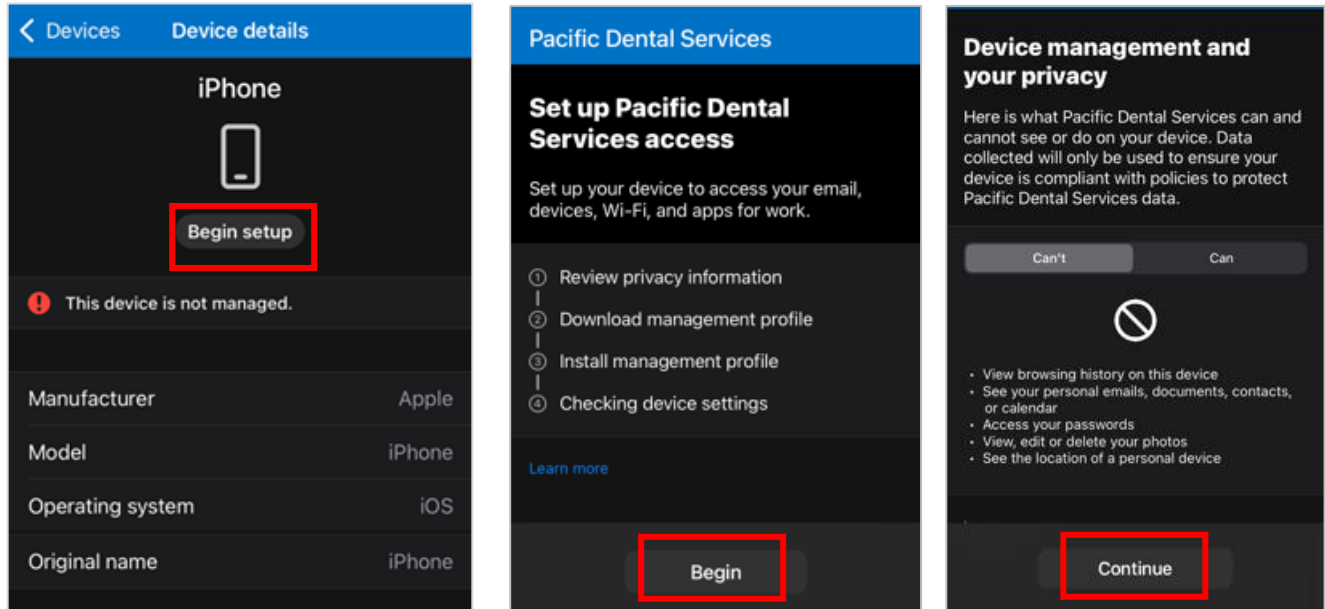

10. Select **Continue**.
11. Select **Allow**.
12. Choose **Close**.
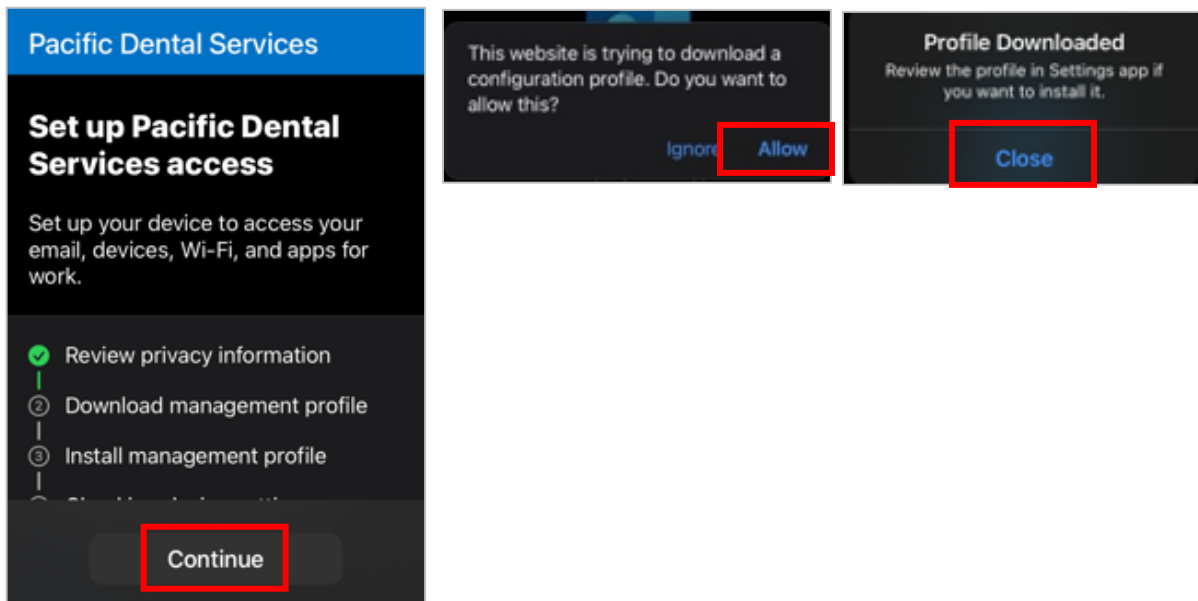

13. Select **Continue**.
14. At the **How to install management profile** window, select the **Home** button.
15. Select **Settings**.

16. Select **Profile Downloaded**.
17. Select **Install**.
18. Enter your device password.

19. Select **Install.**
20. Select **Install.**
21. Select **Trust.**

22. Select **Done.**
23. Return to the homepage and open the Company Portal app.
24. Select **Intune – BYOD IOS Device Category** and select **Continue.**

25. Select **Done**.
26. Select **Apps** to view applications available for download.
